### Full job description

Your new company

Commonwealth Bank is seeking an experienced Automation Test Engineer to join their Business Banking team. This technology team will be responsible for ongoing development and testing of the organisation's digital products, working towards implementing innovative and emerging technology.

Your new role

In this role, you will be responsible for executing and maintaining automated test assets to ensure the desired level of quality and test coverage as well as completing the test activities of system testing, system integration testing, pre implementation testing/staging testing and end to end testing. This position will involve a close collaboration with the scrum team, where strong communication skills will be required to drive testability in solution design.

What you'll need to succeed You will demonstrate the following experience;

- 3 -5 years' experience as a Test Engineer
- Demonstrable in test automation using any tool with Selenium & Appium being desirable
- Web application OR iOS/Android mobile application testing experience
- Demonstrable working experience and an advocate for Agile methodology, and Agile delivery toolset such as JIRA

What you'll get in return:

This is a permanent position with an annual salary of Up to \$115k + Super. You will become a part of a dynamic, fast paced company in the heart of the Sydney City.

What you need to do now:
