land development projects across WA. Your new role will include but not limited to:

- Lead the civil design on various land development and master planned subdivision projects.
- Provide technical design expertise for roads, drainage, earthworks, retaining walls, wastewater infrastructure, water reticulation, and other related infrastructure works.
- Coordinate and verify designs with project teams working across multiple offices
- Embracing a strong digital work environment and delivery culture
- Working in collaboration with other design disciplines to ensure the integrity of the overall design

### **What you'll need to succeed**

Your previous experience in a similar role within this area will lead to your success, as will:

- Demonstrated experience in Land Development projects
- Experience in several facets of the project lifecycle from tendering and concept design through to construction.
- Demonstrated self-management; ability to work autonomously and take ownership of outcomes
- Strong communication and presentation skills.

### **What you'll get in return**

In return for your dedication and hard work you'll be rewarded with:

- Excellent training and personalised career growth
- A creative, innovative and collaborative environment with modern tools and technology
- Flexible work arrangements with an emphasis on work life integration

### **What you need to do now**

If you're passionate about this role, click 'apply now' or for more information and a confidential discussion or to find out about other opportunities in Engineering contact Malcom Tshuma at Hays on 0 8 9254 4563 or email [Malcom.tshuma@hays.com.au](mailto:Malcom.tshuma@hays.com.au) At Hays, we value diversity and are passionate about placing people in a role where they can flourish and succeed. We actively encourage people from diverse backgrounds to apply.
